-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. The examiner indicated in an earlier office action that the foreign priority documents have been received. Upon closer review, the examiner could not find the documents in the file. However, acknowledgment is made of applicant's claim for foreign priority based on an application filed in Great Britain on 11/16/2000. It is noted, however, that applicant has not filed a certified copy of the GB 0027931.5 application as required by 35 U.S.C. 119(b).

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/15/2007 has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. Claims 11,13-30 and 32-40 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the

Art Unit: 2622

relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicant's limitation, "...the image plane comprising at least three rows of pixels for each color that the solid state imaging device is designed to be sensitive to...", cannot be found in the disclosure filed 11/16/2001. The examiner is unable to find support for the image plane being sensitive to any color, let alone three rows of pixels for each color.

Claim Rejections - 35 USC § 103

1. Due to the new matter, the examiner cannot give a reasonable interpretation to a feature that may be implied by applicant's new limitation. Consequently, the claims are analyzed as though they do not contain the new limitation and are rejected under the grounds found in the office action dated 11/15/2006.

Conclusion

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

As to Etoh et al. (US # 6,972,795), Etoh et al. discloses a CMOS image sensor having a dedicated readout channel for only one pixel.

As to Mutoh et al. (US # 7,172,972), Mutoh et al. discloses a CCD solid-state imaging device having a dedicated readout channel for only one pixel.
